SUMMARY

Experienced web developer with a strong work ethic, starting at age 13 and advancing from freelancer to full-time employee in Russia. Most proficient in PHP, Vue, and MySQL. Adaptable and resilient, overcoming challenges from a tough survival under dictatorship in Russia. Currently residing in Georgia (Republic of), seeking stability and safety in Europe due to Russian invasion in Ukraine.

EXPERIENCE

01/2019 - Now
Full Stack Web Developer at McSGG in Tyumen, Russia

- Spearheaded the maintenance and extensive refactoring of legacy PHP infrastructure and services, mitigating significant technical debt.
- Responsible for the overhaul of the company's website, APIs, CRM, and the development of new services utilizing PHP and Node.JS.
- Engineered robust B2B APIs for seamless integration with third-party services, including PayPal, Payeer, Twitch, YouTube, Instagram, VK, Telegram, Discord, and others.
- Demonstrated adept project management skills through meticulous planning and effective task decomposition.

06/2014 - 01/2019
Software Developer at Freelance in Saint-Petersburg, Russia

- Development of mobile applications for the Android platform using Cordova/Ionic/Capacitor and Vue.js, delivering intuitive user experiences and fastest development.
- Contributed to the customization of website content management systems (CMS) such as Invision Community, DataLife Engine, and WordPress, by coding plugins and modules tailored to client specifications.
- Leveraged expertise in Python, Nim, and JavaScript to deliver versatile software solutions across various projects.

CAREER GOALS

- Achieve Senior-level expertise, transitioning from software development to software engineering and proficiently manage projects.
- Attain financial stability to support a comfortable lifestyle and pursue citizenship in the United States, Australia, Canada, or a European Union country.
